Top Prospects Combine Connor McDavid

Connor McDavid has exceeded the target; from more than 4,000 tested players, less than 20 have hit our target line. The goal for an 18-year-old player is 96.36%; Connor is our top player in our proprietary database, and we used his result as our target line for an 18-year-old player. As we can see, Connor was powerful in technical skills, which is the attribute of a world-class hockey player. This spider chart shows us at a glance where the strengths and weaknesses of the athlete lie.

The goal of every ambitious ice hockey player should be to reach the target in their age group. Then he has the certainty of being a very talented ice hockey player. With every year of age, the bar gets higher, so the player must keep training and testing hard, not suddenly get into a stagnation phase.
